

CS 113a - Introduction to Computing

Challenge #4: Implementation of Favicon

To display a Favicon I put the code `<link rel="icon" type="image/x-icon" href="dascel_logo.png">` to display the icon to the left of the page title in the browser tab.

```
File Edit Selection View Go Run ... Search
Challenge #2 Basic xhtml Application.html X
> Documents > EJ IMPORTANT > USM > 1ST YEAR 1-BSCS-A > INTRODUCTION TO COMPUTING > CHALLENGES
1 <!DOCTYPE html>
2 <html>
3   <head>
4     <title>
5       DASCEL CAKES | HOME
6     </title>
7     <link rel="icon" type="image/x-icon" href="dascel_logo.png">
8   </head>
```

And the output for this is the picture below displaying the favicon image in the website.
